PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience as a Full Stack Web Developer Intern at Sandf Technologies, Kozhikode — building multiple web pages with Visual Studio 2022, VS Code, and SQL Server Management Studio. B.Tech IT (2021–2025), skilled in PHP, JavaScript, Python, HTML/CSS, MySQL, and SQL Server; academic projects include a PHP/MySQL alumni platform, a BERT–LSTM model for SQL injection detection, and a TensorFlow Lite cow disease detection system. Currently training in Cloud and DevOps at B-Soft, starting with CCNA networking fundamentals.

WORK EXPERIENCE

Full Stack Web Developer Intern
Jul 2025 – May 2026

Sandf Technologies, Kozhikode

- Created and maintained multiple web pages as a full-stack web developer, working across front-end and back-end development.
- Built and debugged applications using Visual Studio 2022 and VS Code; managed databases with SQL Server Management Studio.

Cloud & DevOps Trainee
Jun 2026 – Present

B-Soft

- Training in Cloud and DevOps practices; began the program with CCNA networking fundamentals.

TECHNICAL SKILLS

Programming Languages: PHP, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3

Frameworks & Libraries: TensorFlow Lite, BERT, LSTM (Deep Learning)

Cloud & DevOps: Google Cloud, XAMPP

Databases: MySQL, SQL Server

Networking: CCNA

Tools & Platforms: Visual Studio 2022, VS Code, SQL Server Management Studio, Android Studio, LaTeX, Microsoft Excel

PROJECTS

Alumnity – Alumni & Student Interaction Platform | PHP, JavaScript, HTML, CSS, MySQL, XAMPP

- Developed a full-stack web application connecting alumni and current students for networking, opportunity sharing, and interactive communication.
- Built the front end with HTML, CSS, and JavaScript; implemented the PHP back end on XAMPP with MySQL data storage.

SQL Injection Detection Model | Python, BERT, LSTM, Deep Learning

- Designed and trained a hybrid deep learning model combining BERT and LSTM to detect SQL injection attacks in user input.
- Combined BERT's contextual language understanding with LSTM's sequential pattern recognition to flag potentially malicious queries.

Cow Disease Detection System | TensorFlow Lite, Android Studio, HTML, CSS, JavaScript

- Built a symptom-based cow disease detection website and Android app powered by an on-device TensorFlow Lite model.
- Developed the web interface with HTML, CSS, and JavaScript on Excel-based decision logic; built the Android app in Android Studio with on-device cow image detection and disease classification.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology
Amal Jyothi College of Engineering (Autonomous), Kanjirapally — APJ Abdul Kalam Technological University

Standard XII
Chinmaya Vidyalaya, Calicut — Kerala State Education Board

Standard X
Silver Hills Public School, Kozhikode — Central Board of Secondary Education

CERTIFICATIONS & TRAINING

Google Cloud Career Practitioner Pathway — Google Developer Student Clubs, AJCE; **"Crack the Git" Workshop** — Google Developer Student Clubs AJCE & ICFOSS; **CONCLAVE** — IEDC CEV (participant); **Robotics Workshop** — IEEE Kerala Section; **LaTeX Workshop** — AJCE; **Product Design Using AR** — Tathva '22, NIT Calicut (Oct 2022); **3D Printing: Design to Hardware** — hands-on training
